

ICC Annual - Compression Therapy In The Year 2025

| From | Til | Duration | Title | Speaker |
|--------------|--------------|--------------|---|-------------------------|
| 08:30 | 09:45 | 01:15 | Compression and Lipedema (Chairs: G. Mosti, JP Benigni) | |
| 08:30 | 08:40 | 00:10 | What is Lipedema | Isabel Forner-Cordero |
| 08:40 | 08:50 | 00:10 | How lipedema differs from obesity | Lourdes Reina Gutierrez |
| 08:50 | 09:00 | 00:10 | How does compression therapy work, what kind of CT? | Juan Vazquez-Diez |
| 09:00 | 09:10 | 00:10 | Influence of fat thickness on interface pressure | Eduardo Da Matta |
| 09:10 | 09:20 | 00:10 | Superwet tumescent liposculpture and the role of CT | Jaume Macià |
| 09:20 | 09:30 | 00:10 | V-registry - Vein-Lymphatic Real World Global Data Project | Sergio Giancesini |
| 09:30 | 09:45 | 00:15 | Discussion | |
| 09:45 | 10:15 | 00:30 | Coffee Break | |
| 10:15 | 11:15 | 01:00 | Compression and Obesity (Chairs: G. Mosti, I Forner-Cordero) | |
| 10:15 | 10:25 | 00:10 | Lymphatic edema, trophic disorders, leg ulcers: role of obesity. | Pascal Filori |
| 10:25 | 10:35 | 00:10 | Compression in obese patients with leg ulcers: pro and contra. | Didier Rastel |
| 10:35 | 10:45 | 00:10 | Obesity and foot static disorders: compression with foot insole. | Jean-François Uhl |
| 10:45 | 10:55 | 00:10 | Compression and skin tightening after massive weight loss. | Patrick Buenos |
| 10:55 | 11:15 | 00:20 | Discussion | |
| 11:15 | 11:45 | 00:30 | Coffee Break | |
| 11:45 | 12:45 | 01:00 | Compression and Dermatology (Chairs: S. Thomis, N Zwarg) | |
| 11:45 | 11:55 | 00:10 | Compression and dermatologic diseases | Joachim Dissemmond |
| 11:55 | 12:05 | 00:10 | Compression therapy and inflammatory mediators | Marco Romanelli |
| 12:05 | 12:15 | 00:10 | Compression therapy in Pyoderma gangrenosum | Valentina Dini |
| 12:15 | 12:25 | 00:10 | Compression therapy and Cellulitis | Elena Conde Montero |
| 12:25 | 12:35 | 00:10 | Compression therapy and diabetic microangiopathy | Armando Mansilha |
| 12:35 | 12:45 | 00:10 | Discussion | |
| 12:45 | 13:30 | 00:45 | Lunch Break | |
| 13:30 | 14:30 | 01:00 | Examining the effect of compression on swelling (Chairs: D. Rastel, E. Da Matta) | |
| 13:30 | 13:38 | 00:08 | Removal of local tissue water by compression | An-Kathleen Heroes |
| 13:38 | 13:46 | 00:08 | Determining leg volume by circumference measurements | Charlotta Jönsson |
| 13:46 | 13:54 | 00:08 | Determining leg volume with 3D Scanner | Luc Labey |
| 13:54 | 14:02 | 00:08 | Importance of determining foot volume in case of compression | Nele Devoogdt |
| 14:02 | 14:10 | 00:08 | Impact of compression on oedema in other body regions | Sarah Thomis |
| 14:10 | 14:18 | 00:08 | Swelling more pronounced in upper half of the leg than in lower half CON | Jean-François Uhl |
| 14:18 | 14:26 | 00:08 | Swelling more pronounced in upper half of the leg than in lower half PRO | Alberto Caggiati |
| 14:26 | 14:34 | 00:08 | What kind of compression is recommended? | Jean-Patrick Benigni |
| 14:30 | 14:45 | 00:15 | Discussion | |
| 14:45 | 16:00 | 01:15 | Abstracts - Discussion included in speaking time [6+2] (Chairs: N. Devoogdt, S. Bohbot) | |
| 14:45 | 14:53 | 00:08 | An Intelligent, wearable compression device | Ed Arkans |
| 14:53 | 15:01 | 00:08 | Tight Alright – a pressure sensing, connected-health system for guiding the application and maintenance of CT | Andrew Cameron |
| 15:01 | 15:09 | 00:08 | Safe and Effective application of Fast'n Go hybrid bandages demonstrated with novel Interface pressure measurement device. | Pierre Gonon |
| 15:09 | 15:17 | 00:08 | Patient preference vs. 30-40 mm Hg interface pressure for venous ulcers: Pilot randomized controlled study (RCT). | Fedor Lurie |
| 15:17 | 15:25 | 00:08 | Development and validation of a multiplatform mobile application for the selection of compression garments | Ruben Molina |
| 15:25 | 15:33 | 00:08 | S.T.R.I.D.E. | Suzie Ehmann |
| 15:33 | 15:41 | 00:08 | Effect of a multicomponent compression system in a single bandage in 343 patients with venous leg ulcer and/or edema: a real-life prospective multicenter study | Joachim Dissemmond |
| 15:41 | 15:49 | 00:08 | Behavior of a multicomponent bandage in a hot environment | Jean-Patrick Benigni |
| 15:49 | 15:57 | 00:08 | Efficacy and safety of a new one-bandage multicomponent system in the treatment of lower limb secondary lymphoedema | Pascal Filori |
| 16:00 | 16:15 | 00:15 | Coffee Break | |
| 16:15 | 17:30 | 01:15 | Abstracts (Chairs N. Devoogdt, M.Hamedinger) | |
| 16:15 | 16:23 | 00:08 | Assessment of a Novel 3-in-1 Short-stretch Compression Bandage System | Valentina Dini |
| 16:23 | 16:31 | 00:08 | Influence of IPC on biophysical tissue properties and skin water in patients with lower limb lymphedema. | Marzanna Zaleska |
| 16:31 | 16:39 | 00:08 | Preventive role of compression garments on the incidence and progression of breast cancer related arm lymphedema | Gursen Ceren |
| 16:39 | 16:47 | 00:08 | Effective Treatment Method for Proximal Lymphedema: A Case Study | Kerelous Estefanous |
| 16:47 | 17:00 | 00:13 | Closing of ICC Annual | |

March 28th, Barcelona
